

CONFIGURAR MULTIPLES MONEDAS

1. Ir a la vista de Stores

The screenshot shows the Magento Admin interface with the 'Stores' menu open. The 'All Stores' option is highlighted with a red circle. The main content area displays a table with columns for 'Store' and 'Store View'. The table contains two rows: 'Chile Website Store (Code: chile_website_store)' with 'Chile (Code: chile)' as the store view, and 'Global Website Store (Code: global_website_store)' with 'Global (Code: global)' as the store view. The interface also includes a sidebar with various navigation options, a search bar, and a 'Create Website' button.

2. Configurar múltiples Stores, como, por ejemplo:

The screenshot shows the Magento Admin interface with the 'Stores' menu open. The main content area displays a table with columns for 'Web Site', 'Store', and 'Store View'. The table contains two rows: 'Chile Website (Code: chile_website)' with 'Chile Website Store (Code: chile_website_store)' as the store and 'Chile (Code: chile)' as the store view, and 'Global Website (Code: global_website)' with 'Global Website Store (Code: global_website_store)' as the store and 'Global (Code: global)' as the store view. The interface also includes a sidebar with various navigation options, a search bar, and a 'Create Website' button.

3. Marcar la opción que permite manejar múltiples monedas base

The screenshot shows the Magento configuration interface. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, and Partners & Extensions. The main content area is titled 'Configuration' with a 'Scope' of 'Default Config'. A 'Save Config' button is in the top right. The 'Price' section is highlighted with a red circle and a red arrow. Below it, the 'Catalog Price Scope' is set to 'Website'. At the bottom, 'Layered Navigation' settings are visible, including 'Display Product Count' (Yes) and 'Price Navigation Step Calculation' (Automatic).

4. Configurar la moneda base según el Store 1

The screenshot shows the 'Configuration' page for 'Global Website'. The 'Currency Options' section is active. It includes three main settings: 'Base Currency' (US Dollar), 'Default Display Currency' (US Dollar), and 'Allowed Currencies'. The 'Allowed Currencies' list includes US Dollar, Ugandan Shilling, Ukrainian Hryvnia, United Arab Emirates Dirham, Uruguayan Peso, Uzbekistani Som, Vanuatu Vatu, Venezuelan Bolivar (1871-2008), and Venezuelan Bolivar (2008-2018). Each setting has a 'Use Default' checkbox. A search bar and user profile are visible in the top right.

5. Configurar la moneda base según el Store 2

The screenshot shows the 'Configuration' page in Magento. The left sidebar contains navigation menus for 'GENERAL', 'CATALOG', and 'CUSTOMERS'. Under 'GENERAL', 'Currency Setup' is selected. The main content area is titled 'Currency Options' and includes the following settings:

- Base Currency [website]:** Chilean Peso. Use Default. A note below states: "Base currency is used for all online payment transactions. The base currency scope is defined by the catalog price scope ("Catalog" > "Price" > "Catalog Price Scope")."
- Default Display Currency [store view]:** Chilean Peso. Use Default.
- Allowed Currencies [store view]:** A list of currencies including CHF Franc, Cambodian Riel, Canadian Dollar, Cape Verdean Escudo, Cayman Islands Dollar, Chilean Peso (highlighted), Chinese Yuan, Colombian Peso, Comorian Franc, Congolese Franc, and Costa Rican Colón. Use Default.

At the top right, there is a search icon, a notification bell with '1', and a user profile icon. A 'Save Config' button is located at the top right of the configuration area.

6. Configurar la tasa de cambio

The screenshot shows the 'Stores' configuration page in Magento. The left sidebar contains navigation menus for 'Stores', 'SYSTEM', and 'FIND PARTNERS & EXTENSIONS'. Under 'Stores', 'Currency Rates' is selected and circled in red. The main content area is titled 'Currency Rates' and includes the following settings:

- Options:** A dropdown menu.
- Reset:** A button.
- Save Currency Rates:** An orange button.
- USD:** A section for configuring the USD exchange rate, with a text input field and a value of 1.0000.

At the top right, there is a search icon, a notification bell with '1', and a user profile icon. At the bottom right, the text 'Magento ver. 2.4.4' is displayed, along with links for 'Privacy Policy' and 'Report an Issue'.

7. Configurar la tasa de cambio

11. Si se desea probar fácilmente la configuración por Store podemos agregar el código del store al URL

The screenshot shows the Magento 2 Configuration interface. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, and Partners/Extensions. The main header is 'Configuration' with a search icon, a notification bell with '1', and a user profile icon labeled 'user'. Below the header, the 'Scope' is set to 'Default Config'. A 'Save Config' button is in the top right. The left sidebar is expanded to 'GENERAL', with 'Web' selected. The 'Web' section contains several settings:

- Url Options**
 - Add Store Code to Urls** (global): Set to 'Yes'. A red arrow points to this dropdown. There is an unchecked checkbox for 'Use system value'. A warning note states: 'Warning! When using Store Code in URLs, in some cases system may not work properly if URLs without Store Codes are specified in the third-party services (e.g. PayPal etc.).'
 - Auto-redirect to Base URL** (store view): Set to 'Yes (302 Found)'. There is a checked checkbox for 'Use system value'. A note explains: 'i.e. redirect from http://example.com/store/ to http://www.example.com/store/'.
 - Catalog media URL format** (global): Set to 'Unique hash per image variant (Legacy mode)'. There is a checked checkbox for 'Use system value'. A note says: 'Images should be optimized based on query parameters by your CDN or web server. Use the legacy mode for backward compatibility. Learn more about catalog URL formats.' A warning note follows: 'Warning! If you switch back to legacy mode, you must use the CLI to regenerate images.'
